Who Cares Anyway?

Not everybody cares what you did. It's in the paper, but some folks won't

It's because they just weren't interested. . That's a painful thing, sometimes, but important to remember before you "cuss out" the editor for not putting a bigger headline on the story of your club meeting, your visit or whatever it was.

Nobody can tell exactly how many people will read a given story. But newspaper editors and writers are trained and experienced in having a sort of sixth sense to tell.

One story will automatically rate page one. Another rates page one with a big headline. Still another is dropped down to a couple of paragraphs on an inside page.

But an inside page is still read. (You are reading this one, aren't you?)

The front page is a newspaper's show window. On it are displayed what the editors honestly believe are the most important news events, human interest stories or pictures of their offerings that day.

The front page is sacred to newspapers. It cannot be bought. You could not, if you wished, bribe your way into the front page of this newspaper.

But if what you have done is rated among the 20 or so best of the week's hundred or so news stories, then you can't pay to keep

MEASURE OF POPULATION GAIN-The U. S. population is increasing at a phenomenal rate. By 1975 rising birth rates and declining death rates are expected to add 40 to 60 million people. This is roughly equivalent to the 52 million people living in the 22 states west of the Mississippi River. The National Association of Manufacturers says that to provide jobs for the estimated 22 million new people entering the work force will require an investment of at least \$264 billion in plants and equipment. The estimate is based on studies which show that today's average investment per job is about \$12,000.

> ONE BY ONE they approached the table and signed the document . . . 56 men representing the colonial areas which, from that day on, were to be known as the United States of America . . . 56 men who pledged a united dedication to the cause of individual freedom. The ideas in the Declaration of Independence have been challenged many times since that day. The newspaper in your hands probably tells of fresh challenges. And so today, as 178 years ago, freedom calls for a "pledge to each other"—a pledge to make each of our homes secure.

Most Americans have found that one of the most effective ways to provide that security is by investing in U. S. Savings Bonds.

Security is simple on the Payroll Savings Plan Eight million working people are profiting by steady investment in U. S. Savings Bonds through the convenient Payroll Savings Plan. Why don't you join them? Just go to your company's pay office and sign up to save whatever amount you want put away for you each payday. That amount will

be saved for you-before you draw your pay.

If you want approximately \$5,000 \$10,000 \$25,000 Each week for 9 years and 8 months, save.... \$8.80 \$18.75 Each week for 19 years \$3.75 and 8 months, save..... \$7.50 This chart shows only a few typical examples of savings goals and how to reach them through Payroll Savings. Remember, you can save any sum you wish, from a couple of dollars a payday up to as much as you want. The important thing is, start your Plan today!

Then, as the dollars add up, they'll be invested for you in a Series E U. S. Savings Bond. And as time goes by they become more and more valuable, earning an average of 3%

interest per year. Do you want to know what that can mean?

Why not get started right now? Sign up for steady, systematic
